Smart Template Wizard

What does the Smart Template Wizard do?

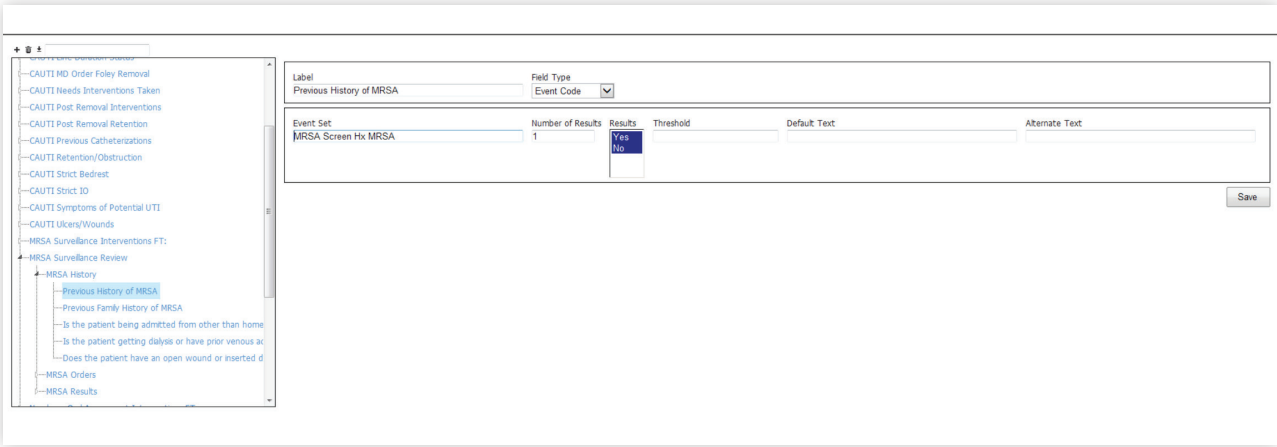

This MPage allows staff without CCL experience to build basic smart templates.

Product description

The Wizard builds smart-templates based on orders, event codes and dynamic group data.

Smart Template Wizard features include:

- the capability to aggregate data from multiple chart locations into one easy-to-read format.
- the ability to quickly determine the patient’s condition, related to a particular condition or illness, while documenting the steps taken to address the issue.

Prescription Routing

Value proposition

This custom program automatically routes prescriptions to the nearest printer. Physicians do not have to manually select a printer from a long list of unfamiliar names and locations.

Prescription Routing features include:

- A CCL program that automates prescription print routing
- Currently configured for Zebra printers

Custom Prescription Routing program automates printer selection for printing ease.
